SUMMARY

Software Engineer with 3+ years of experience architecting high-reliability enterprise applications, RESTful APIs, and automated integration pipelines using JavaScript (ES6+) and TypeScript. Specializes in state-driven transaction engines, asynchronous batch processing, fault-tolerant workflows, scalable architecture, and enterprise system integrations.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python
Frontend: React, HTML, CSS, Tailwind CSS
Backend: Node.js, FastAPI, REST APIs
Systems & APIs: Microsoft Graph API, REST
Enterprise: SuiteScript 2.1, SuiteQL, SDF, Freemarker Advanced PDF/HTML Templates
Version Control: Git

PROFESSIONAL EXPERIENCE

Software Engineer — Technical Consultant

Aug 2023 – Present

Ennvee Solutions

- Architected a configuration-driven **PMO platform in NetSuite** for project management, resource allocation, time/leave tracking, labour classification, and claims using Client Scripts, Suitelets, and a centralized RESTlet service layer.
- Designed a fault-tolerant **SuiteScript 2.1 Sales Order closure workflow** to automate complex order-closing rules, validate transaction state, and reliably process dependent records with governance-aware execution and recovery.
- Redesigned governance-intensive Vendor Bill processing into an **asynchronous queue-based architecture**, reliably handling **100+ line transactions** with duplicate prevention, retry logic, and automatic resubmission.
- Built a stateful **multi-stage Timecard Processing Platform** automating calendar-aware timecard generation, leave/billing calculations, CSV imports, amendments, retries, and audit tracking with caching for high-volume processing.
- Architected custom Suitelet applications including a configurable **Timesheet Management system** with approval workflows and an interactive sales tool that reduced manual line entry by **75%** through dynamic sourcing and asynchronous UI processing.
- Engineered a configuration-driven **HRMS recruitment and resume platform** covering candidate lifecycle, interview workflows, employee profiles, and dynamic PDF/Word resume generation.
- Integrated **Microsoft Graph API and Microsoft Teams using OAuth 2.0** to automate interview scheduling, cancellation, interviewer lookup, calendar events, and meeting synchronization.
- Developed a **GST-compliant e-invoicing integration for Indian invoices**, automating invoice submission, validation, and synchronization between NetSuite and external e-invoicing services.
- Built **configuration-driven PDF consolidation and financial automation workflows** for invoices, credit memos, and bill payments, supporting batch processing of up to **100 transactions per execution**.

EDUCATION

SRM Institute of Science and Technology

B.Tech Computer Science. CGPA 9.37
